

PRODUCT DESCRIPTION:

BD-3-C is a concentrated butyl + caustic cleaner/ degreaser that will dissolve grease, oil, mold, mildew, soap scum, and other problematic soils. BD-3-C is very effective in cold or hot water and in the high pressure washing of service stations, maintenance garages, heavy duty equipment, mobile homes, RV's, trucks, trailers, buildings, and other industrial surfaces. BD-3-C is also an excellent pre-spray for use on difficult cleaning jobs such as engines, vinyl, white wall tires, stainless steel, floors, walls and counter tops. BD-3-C is a popular favorite for its results in the cleaning of black streaks from gutters, as well as in industrial floor scrubbers.

DIRECTION FOR USE:

BD-3-C is a concentrate, and in most applications should be diluted prior to use. Best dilutions range from 1 to 5 parts cleaner to 50 parts water. However, when used as a pre-spray, it may be used full strength depending on severity of soil. When used through pressure washing equipment, drop detergent feed line into the concentrated cleaner, set metering valve to desired setting, and soak entire surface from bottom up. Detail clean from bottom up and rinse from the top down.

Do not allow to dry on surfaces, always rinse thoroughly. All products should be tested in an inconspicuous area.
