

#### PRODUCT DESCRIPTION:

Salt Shaker is a premium truck wash product formulated specifically for use during the tough winter months. Salt Shaker is first and foremost a heavy duty concentrated detergent designed to remove heavy soil and road film. It also chemically removes salt, calcium chloride and de-icing products used on winter roads. Lastly, Salt Shaker contains a winter protection package that leaves behind a binding carnauba wax for shine and protection, as well as heavy corrosion inhibitors for continued protection against the natural tendency of salt to corrode vehicle undercarriages and other metal surfaces. Salt Shaker works well on any surface or equipment affected by winter elements, such as trucks, trailers, construction equipment, snow plows, boats, docks and fifth wheels. Works well in hard or soft water, in cold or hot water.

#### DIRECTIONS FOR USE:

Dilute up to 1:80 depending on severity of the job at hand. Colder temperatures and harder water will necessitate more concentrated use. When cleaning with pressure washers, always apply cleaning solutions from the bottom up on a dry surface. Always detail clean from the bottom up and rinse from the top down. Do not use on any aluminum or painted surfaces at concentrations of less than 1:40. Do not allow to dry on surfaces. Always rinse thoroughly.
