

### PRODUCT DESCRIPTION

**Lemon Dancer Bleach Enhancer** is a non-hazardous bleach friendly additive with a pronounced fresh lemon scent designed to mask bleach odors. Thick lemony foam generated with your bleach cleaning solutions will enhance the cleaning process saving time and expense. Thicker foam will aid in extending the contact time of your sodium hypochlorite "bleach" to cling on to roofs, walls, etc. Lemon Dancer Bleach Enhancer contains an extra penetrating surfactant to accelerate a more effective advanced bleach cleaning along with a pleasant lemon scent that pleases both the applicator as well as the home owner. Can be used with most house and roof cleaning solutions, with or without bleach.

### DIRECTIONS FOR USE:

Depending on desired foam and thickening action, use 1-8 oz. of Lemon Dancer per gallon of bleach/water mix, however applied. Begin with 1 oz. per gallon and increase to desired foam profile and thickness. Do not overuse product - if mixed too strong, solution may become difficult to pull from containers and difficult to rinse from surface. Do not allow product to mix and store with bleach for long periods of time – use mixed product within one week.

**Do not allow to dry on surfaces, always rinse thoroughly. All products should be tested in an inconspicuous area.**

### Section 4: CAUTIONS & FIRST AID MEASURES

**INHALED** - If fumes, aerosols or combustion products are inhaled remove from contaminated area. Other measures are usually unnecessary.

**EYE CONTACT** - If this product comes in contact with the eyes: Wash out immediately with fresh running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. Seek medical attention without delay; if pain persists or recurs seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

**SKIN** - If skin contact occurs: Immediately remove all contaminated clothing, including footwear. Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation. **IF SWALLOWED** - If swallowed do NOT induce vomiting. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice.
