- PRESSURE WASHERS
- STEAM CLEANERS
- PARTS WASHERS
- CHEMICAL SOLUTIONS
- WATER TREATMENT SYSTEMS

PRODUCT DESCRIPTION:

HC-1 Concentrate is designed as the first step in a two-step cleaning system. This cleaning system is widely considered the most effective for the cleaning of over the road tractors and trailers.

DIRECTIONS:

The two step chemical should be applied using a two chemical pressure washer system. Apply HC-1 Concentrate through a pressure washer at the rate of 1 to 25 to a dry surface. Without rinsing, apply HC-2 on top of HC-1. Turn both off and detail clean from the bottom up. Rinse thoroughly to avoid the possibility of streaking. DO NOT USE ON GLASS OR MIRROR POLISHED ALUMINUM.

FOR INDUSTRIAL & INSTITUTIONAL USE ONLY!

When using any commercial/industrial cleaning compound always pre-test product on an inconspicuous area to determine surface compatibility. Always use proper protective equipment. Read and understand contents of Material Safety Data Sheets before using any cleaning compound.

CAUTIONS:

DO NOT USE THIS PRODUCT UNDILUTED. Do not allow solutions of this product to dry on surfaces. Avoid eye and skin contact. Wear rubber gloves, eye & face protection, rubber apron and boots. Do not allow to freeze. Do not store at temperatures above 120 F. KEEP OUT OF THE REACH OF CHILDREN!

EMERGENCY FIRST AID:

EYES - All exposures are considered severe. Decontaminate in eye wash for 15 minutes or use a hose glass providing a copious amount of water for the same amount time. Irrigate with 600 to 1000 cc's of calcium gluconate 1% in saline solution while holding eyelids open. If available, use a Morgan lens and a local anesthetic. Seek immediate medical attention. **SKIN** - Wash affected area for 5 minutes. Remove all clothing. Do not remove goggles until decontamination has occurred. Initiate calcium gluconate 2.5% gel NOTING THE TIME. Get immediate medical attention. **INGESTION** - Do not induce vomiting. If victim is conscious, give orally high amounts of any acid. Seek immediate medical attention. **INHALATION** - Initiate oxygen administration at a 2 to 6 L per minute flow and nebulize a solution of calcium gluconate at 2.5% concentration until medical help is reached.

CONTENTS: Hydrofluoric acid, Sulfuric acid, Phosphoric acid and other non-hazardous ingredients.

Hydrofluoric Acid solution with not more than 60% strength, 8, NA-1760, PG II, Poison
ITEM #1159
